

AUTOMATICALLY LIMIT YOUR VEHICLES' SPEED

Are your staff driving company vehicles beyond the legal speed limit?

Is the safety of the driver, passengers, public, wildlife, and domestic stock being jeopardised by excessive vehicle speed?

Are your vehicles suffering from tyre and brake abuse, excessive fuel usage, and accident damage due to over-speeding?

If so, consider vehicle speed-limiting devices from Mine Technology Services Ltd.

Geo-fencing example shaded in red

Why use vehicle speed limiters?

Governments are reviewing their legislation to require trucks and passenger service vehicles to be fitted with speed-limiters. What is the policy in your region?

The immediate benefits of speed limiters are;

- Improved safety
- Lower maintenance costs of tyres and brakes.
- Substantial fuel savings of up to 30% and reduced carbon footprint
- Reduced risk of asset damage and public liability

What is unique about the GeoKontrol option and why does this have applications in our environment?

- Total speed control within desired zones such as mine sites, quarries, airports, National Parks and Reserves, restricted areas etc; vehicles entering the Geo-fenced zone will

automatically be speed-limited to a speed specified by the customer

- The Geo-fence can be easily changed and designed to each customer's requirements

Why use MTS's vehicle speed limiters?

- MTS can control the speed of any vehicle or machine
- The preferred option for most vehicle manufacturers in the world
- 3 year warranty on equipment
- Data logging of speed events with web-based reporting
- Service and support throughout Africa
